

EPIDEMIOLOGICAL SITUATION COVID-19, Nepal

6 Aug 2020

Ministry of Health & Population
Department of Health Services

Epidemiology & Disease Control Division (EDCD)

Teku, Kathmandu

Developed with technical assistance from World Health Organization, Nepal

Overview: Week 32

This update is based in 21388 cases and 59 deaths.

- Total district affected: 77/77
- Total province affected: 7/7

Week 20 to wk 32:

- 7 provinces/77 districts reported cases during this period.
- 21277 confirmed cases, constitutes 99.4% of total confirmed cases
- Deaths from wk 20 to wk 32 : 60 (all deaths)

In last 14 days

3396 cases reported in last 14 days, constitutes 15.9% of total confirmed cases.

Districts/Provinces: 71 districts from 7 provinces reported cases.

6 districts did not report any cases in last 14 days, which are Bhojpur, Dolpa, Manang, Mustang, Rukum East, Sankhuwashbha.

On 5 Aug 2020

- 381 new cases
- All 7 provinces reported cases

Province 1	Province 2	Bagmati	Gandaki	Province 5	Kamali	Sudur Paschim
19	225	69	23	23	11	11

Core epidemiological variables under process for some cases and 1 death.

Note: Week runs from Sunday till Saturday . (based on reported date)

Summary of laboratory-confirmed COVID-19 cases, deaths and transmission by province

Transmission classification based on [WHO definitions](#)

Reporting Province	Total confirmed cumulative cases	Total cumulative deaths	Transmission classification*	District affected (total districts)	Date of most recent case [#]
Province 1	1333	3	Cluster of cases	14 (14)	05/08/2020
Province 2	1651	19	Cluster of cases	8 (8)	05/08/2020
Bagmati	2037	11	Sporadic cases	13 (13)	05/08/2020
Gandaki	1230	5	Sporadic cases	11 (11)	05/08/2020
Province 5	5863	10	Cluster of cases	12 (12)	05/08/2020
Karnali	4424	4	Cluster of cases	10 (10)	05/08/2020
Sudurpaschim	4850	7	Cluster of cases	9 (9)	05/08/2020
National Total	21388	59	Cluster of cases	77 (77)	05/08/2020

- Date of last case is the date of onset or date of sample collection or date of lab report based on information available.

*Case classification is based on [WHO transmission classification](#)

No cases- provinces with no cases

Sporadic cases- provinces with one or more cases, imported or locally detected

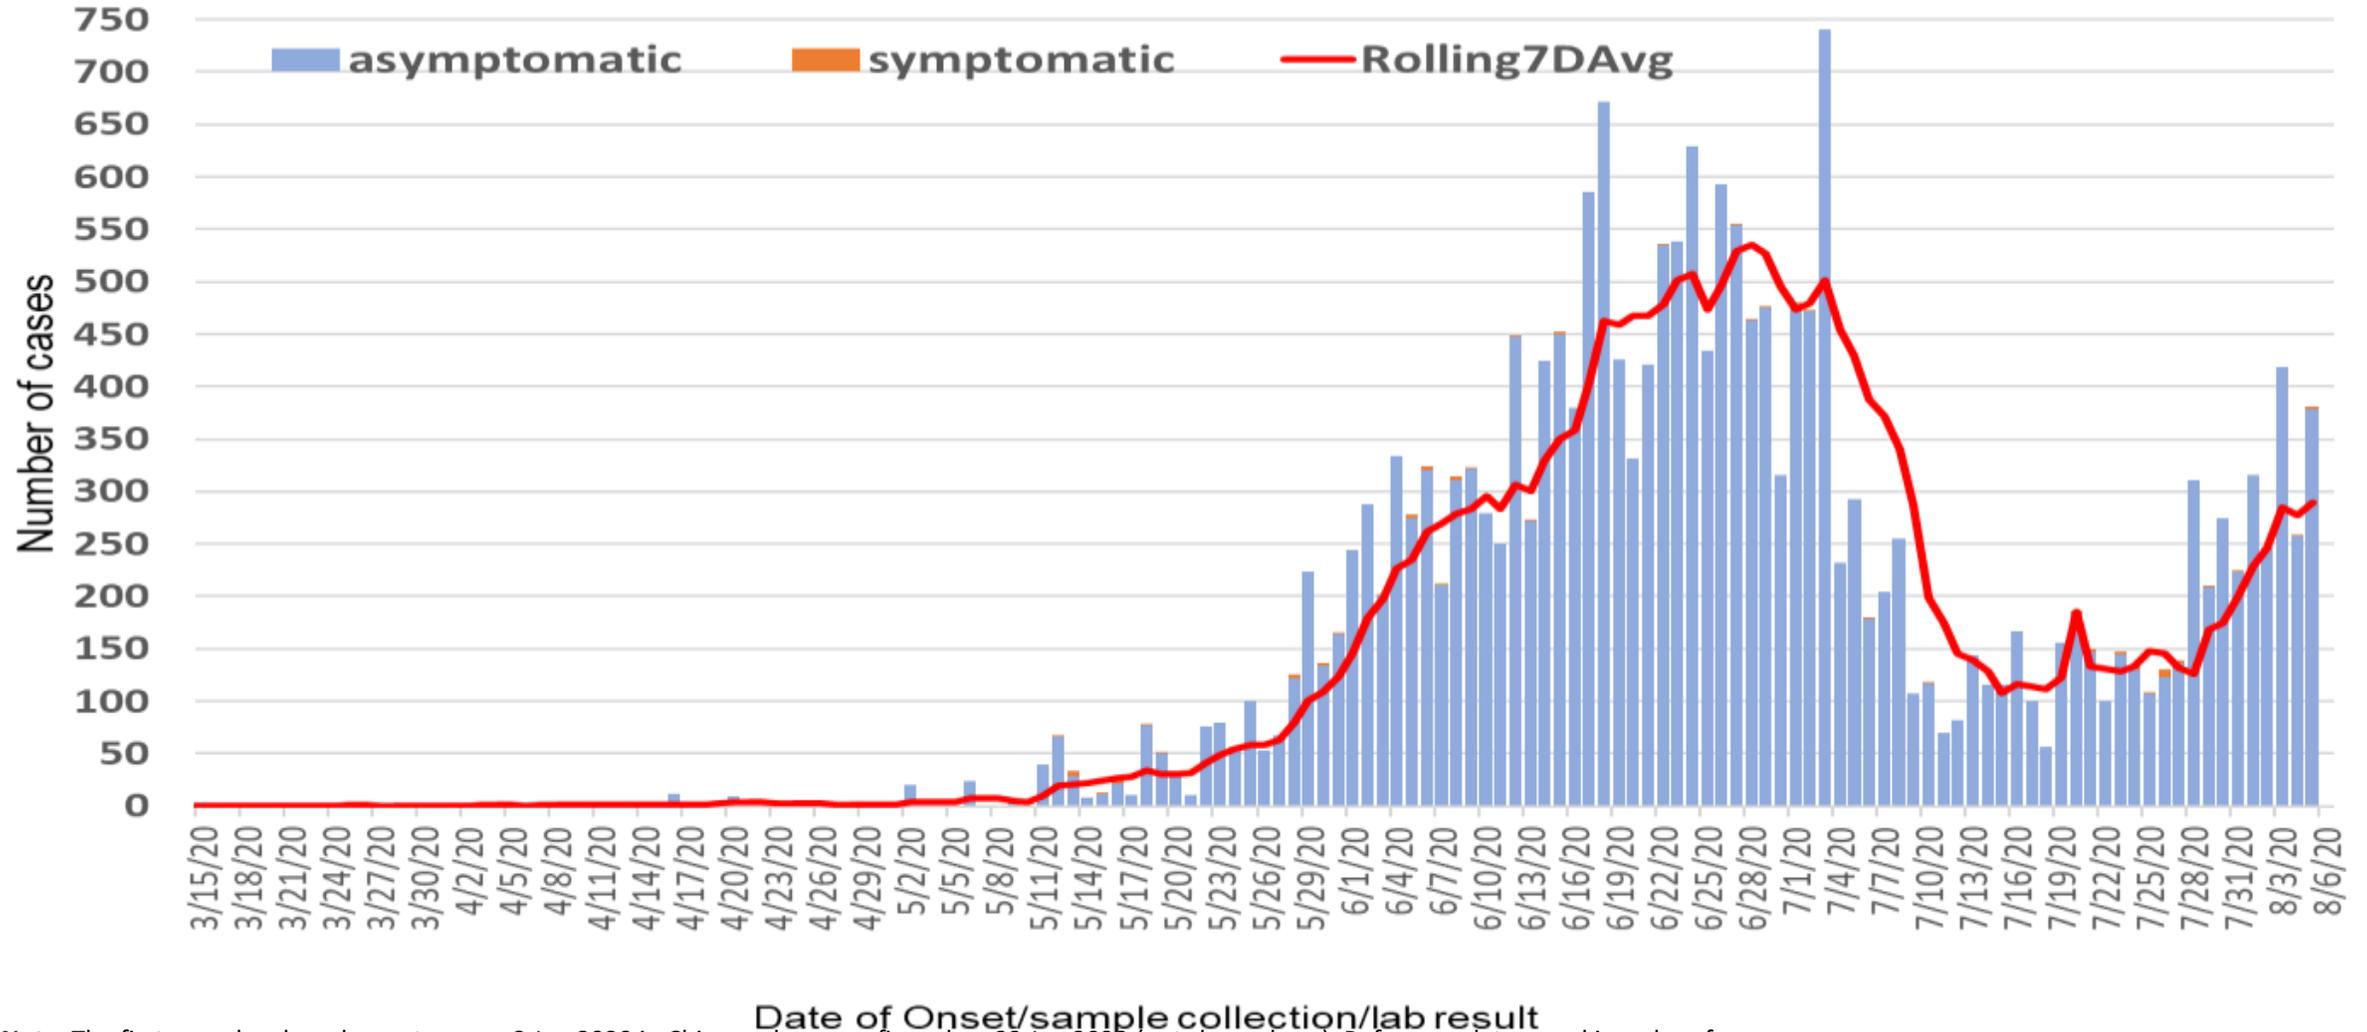

Cluster of cases- provinces experiencing cases, clustered in time, geographic location and/or by common exposures

Community transmission- experiencing larger outbreaks of local transmission defined through an assessment of factors including, but not limited to:

- Large numbers of cases not linkable to transmission chains
- Large numbers of cases from sentinel lab surveillance
- Multiple unrelated clusters in several areas of the country/territory/area

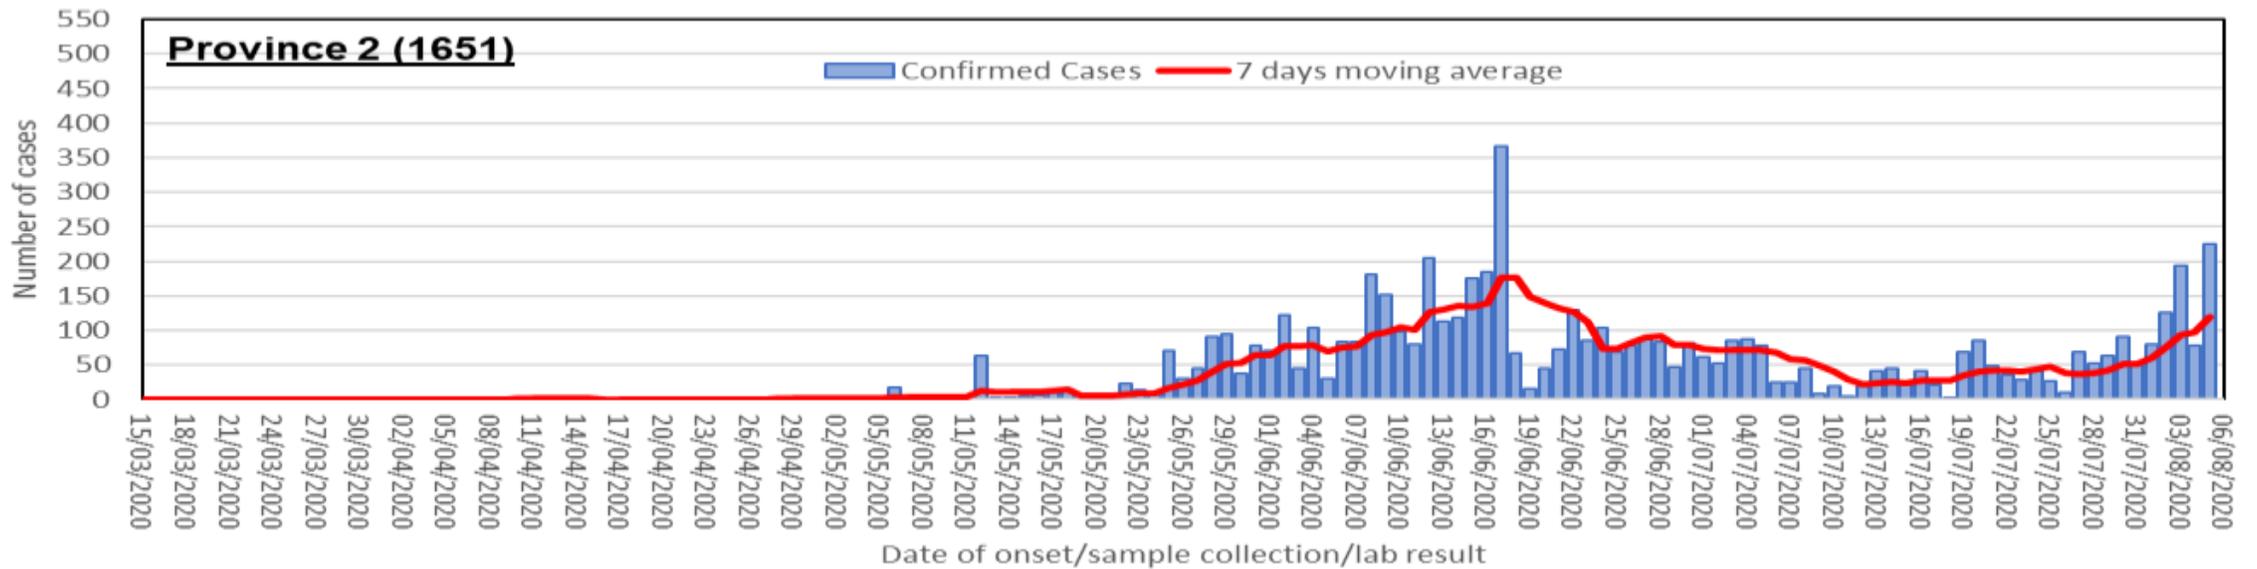

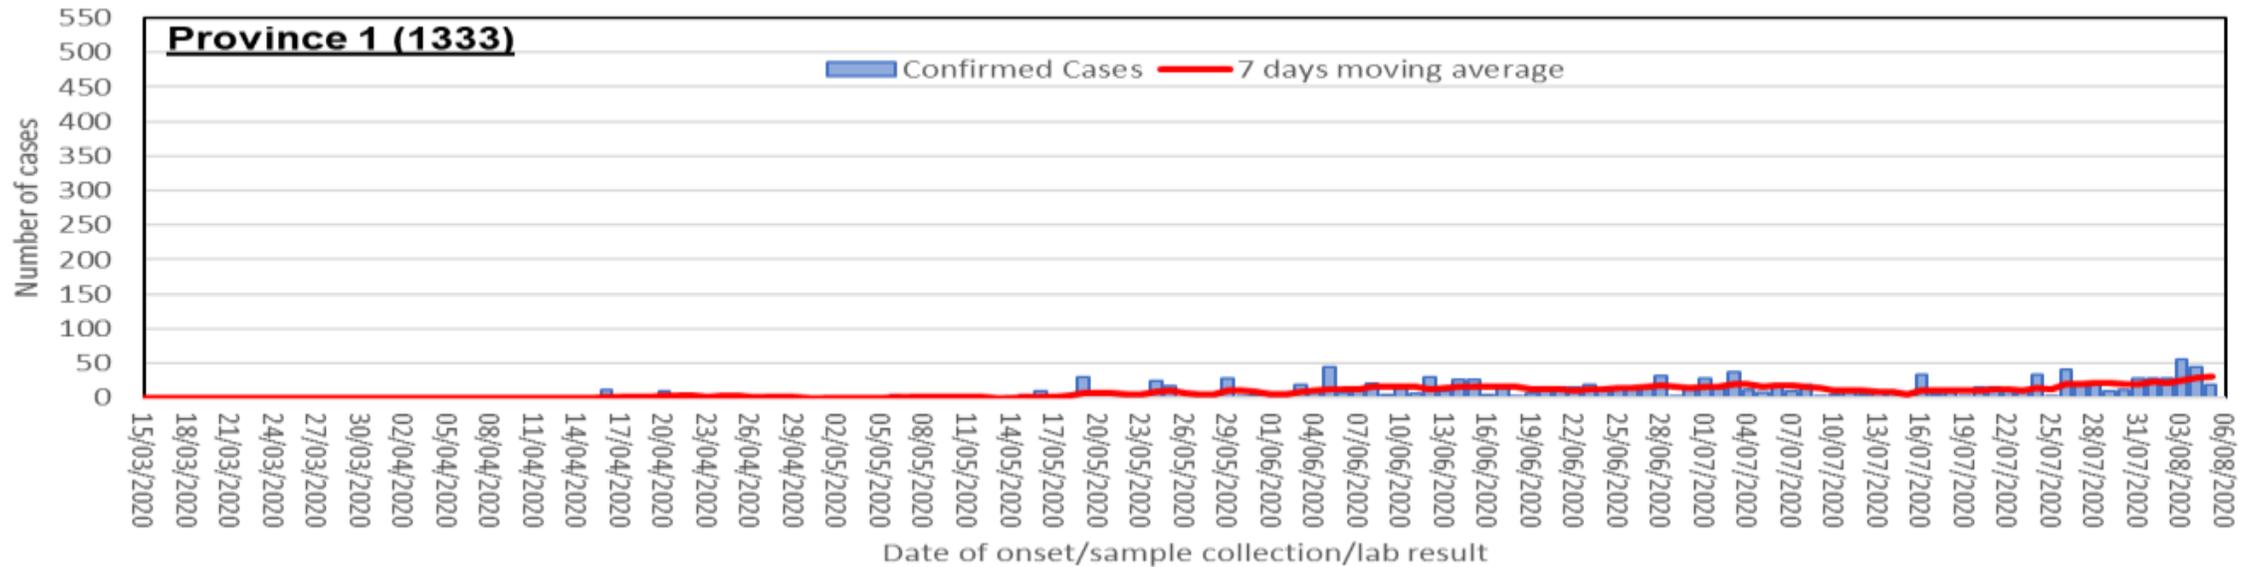

Time distribution

Laboratory confirmed COVID-19 cases and average number of COVID-19 cases over the last seven days, by date of onset/sample/confirmation (N= 21388)

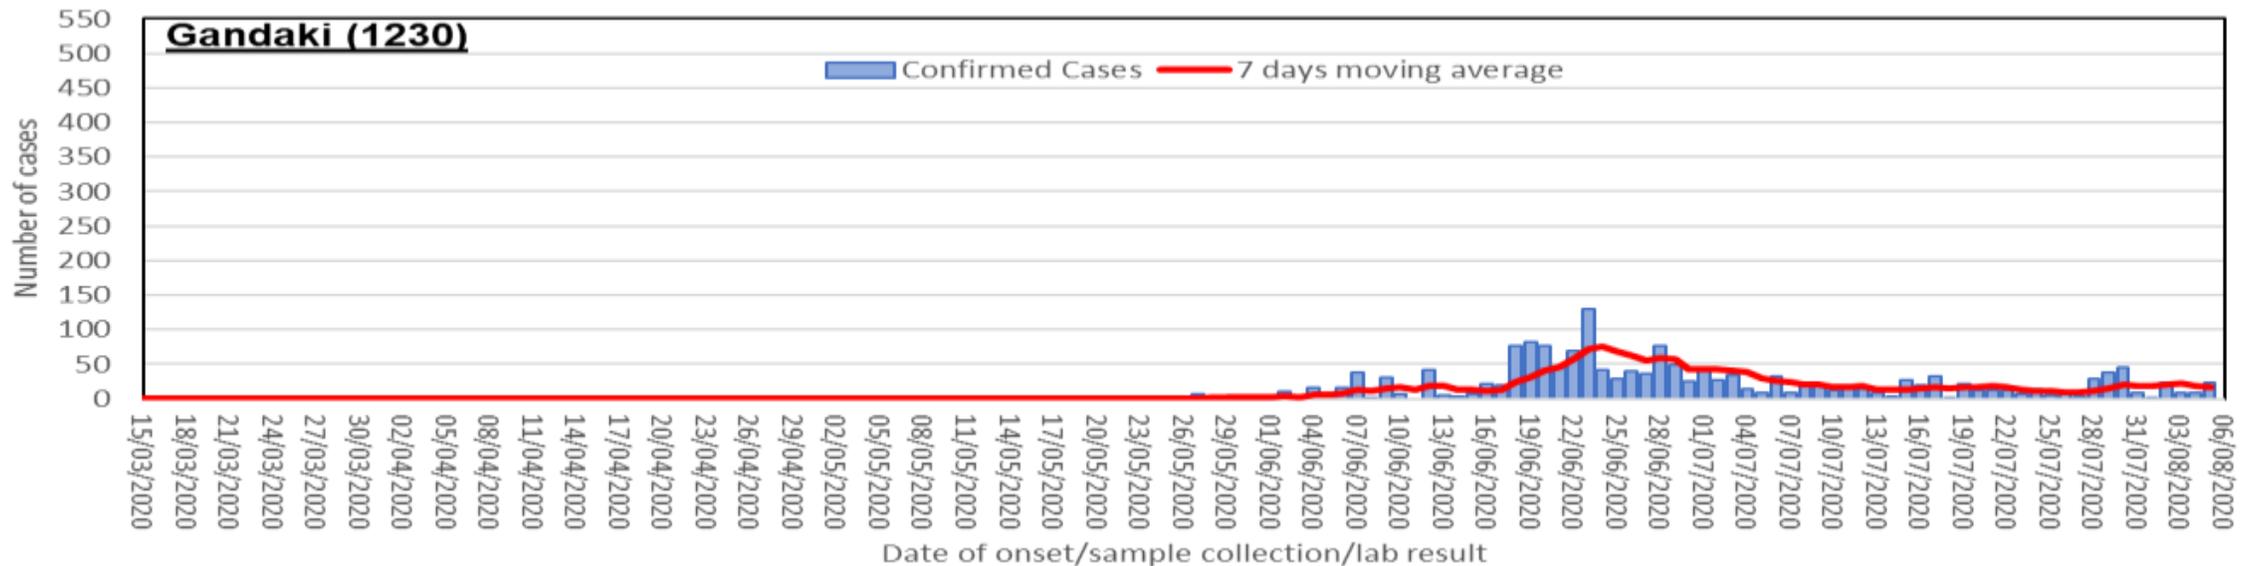

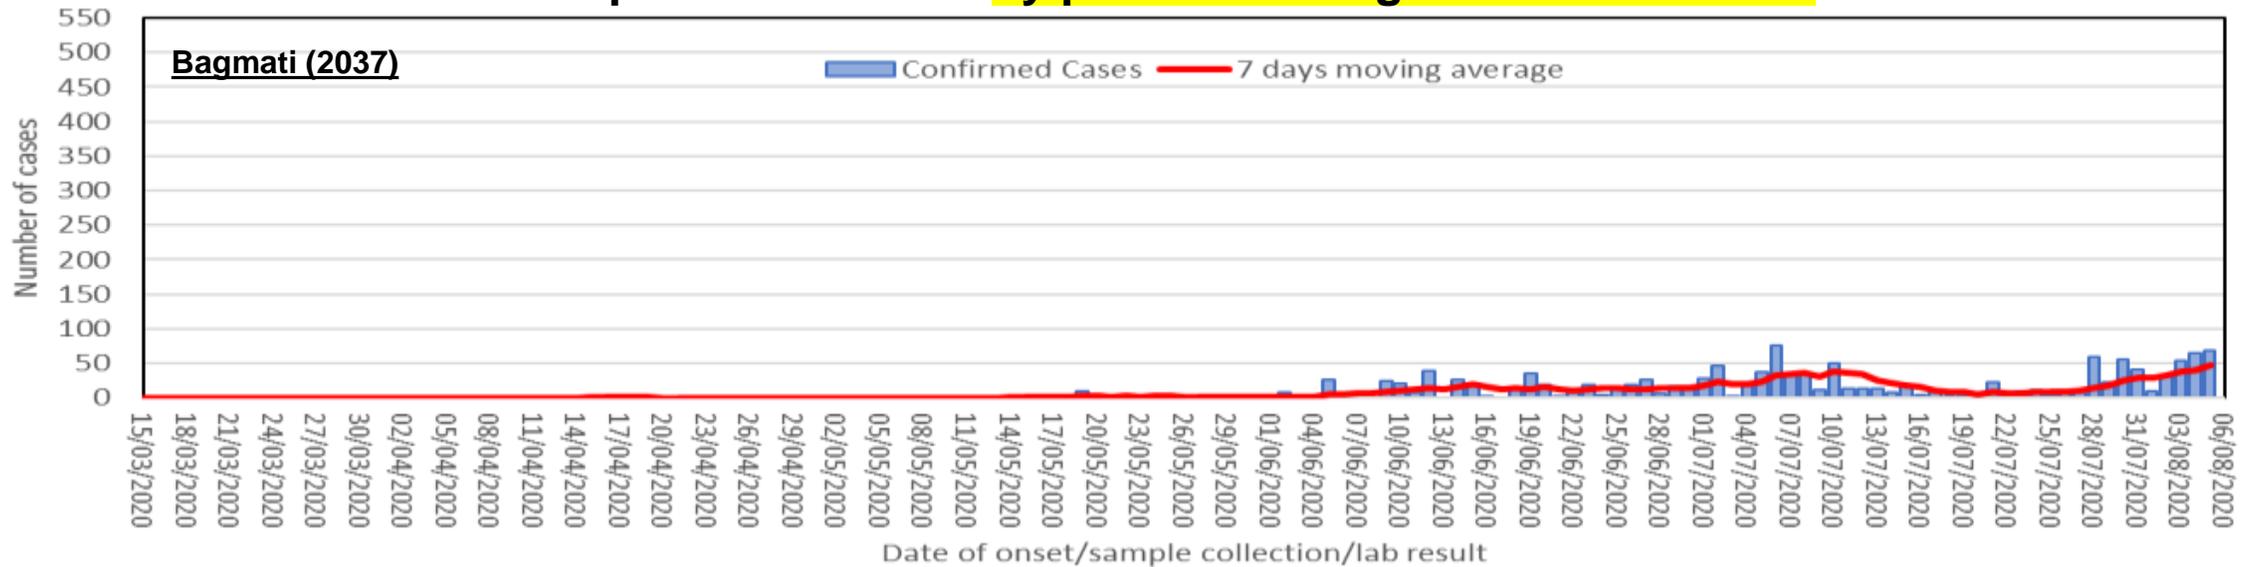

Note: The first case developed symptoms on 3 Jan 2020 in China and was confirmed on 23 Jan 2020 (not shown here). Reference dates used in order of preference as available – Date onset/Date of sample collection/Date of confirmation. Clinical information presented here is collected on the day of sample collection.

Lab confirmed COVID-19 cases and 7-day rolling average of cases by date of onset/sample/confirmation by province – 1 and 2

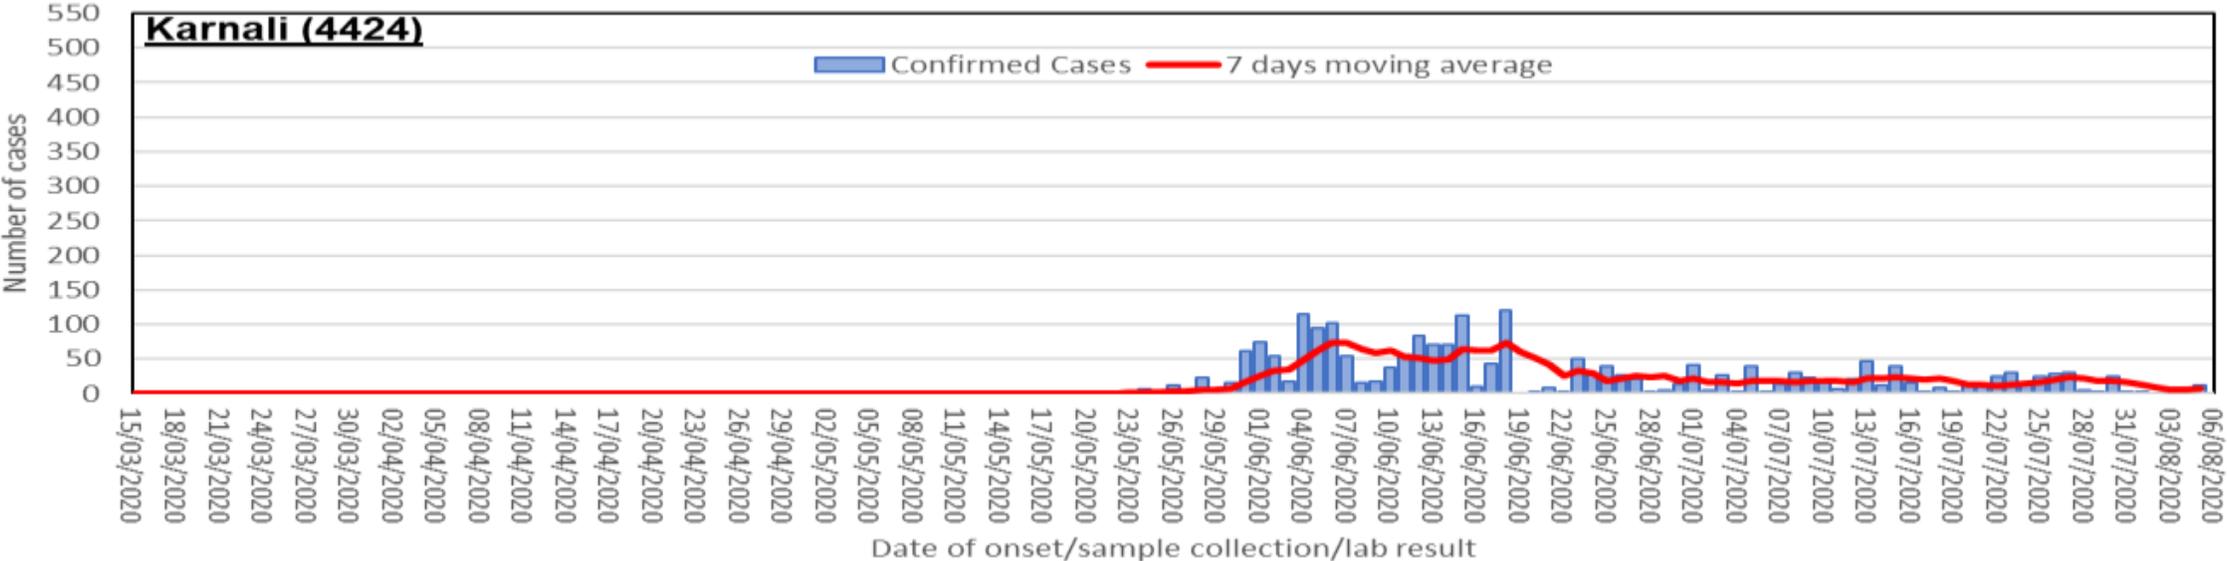

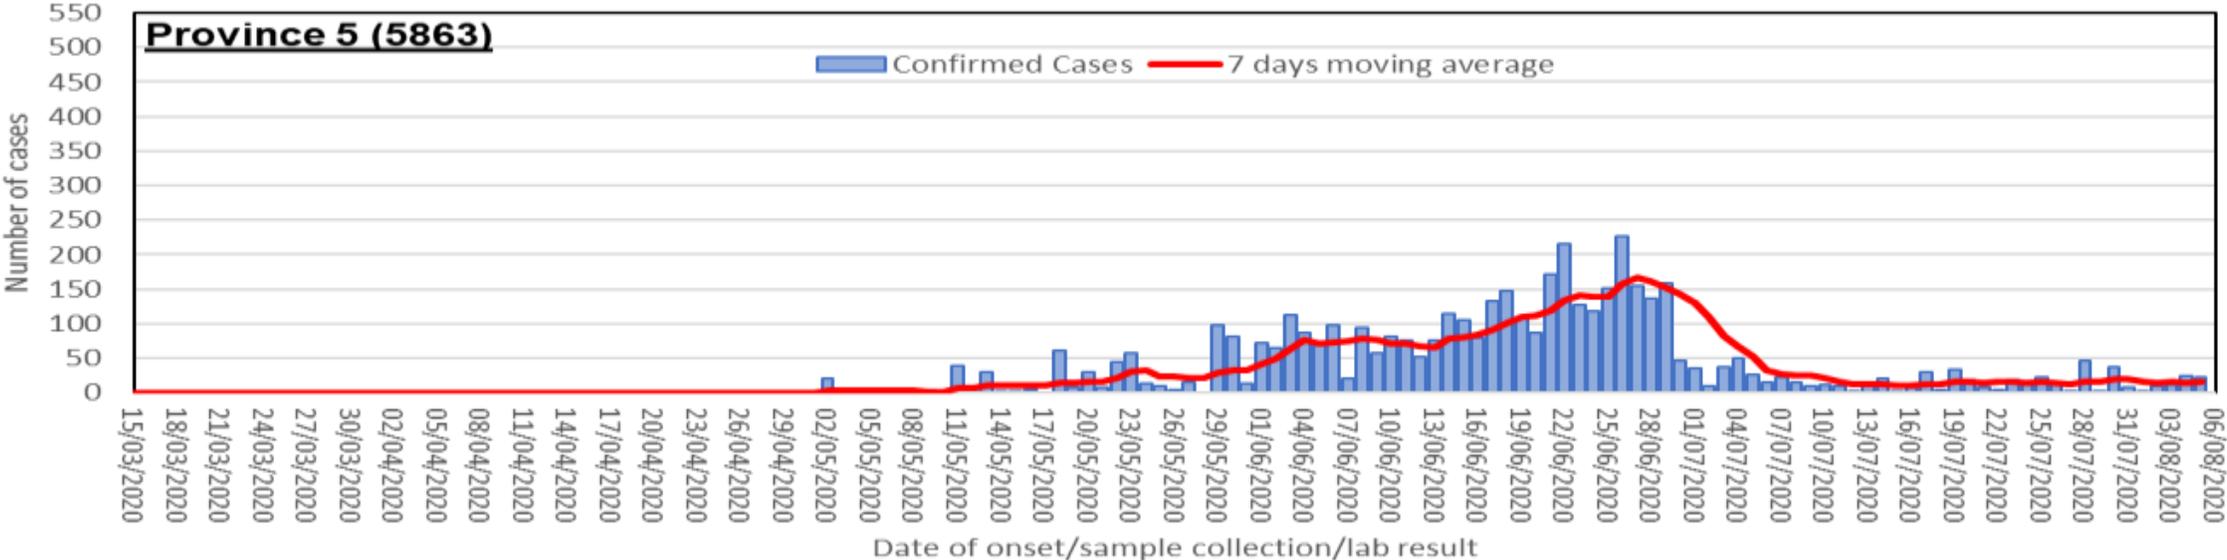

Note: The first case developed symptoms on 3 Jan 2020 in China and was confirmed on 23 Jan 2020(not shown here). Reference dates used in order of preference as available - Date onset/Date of sample collection/Date of confirmation.

Lab confirmed COVID-19 cases and 7-day rolling average of cases by date of onset/sample/confirmation by province – Bagmati and Gandaki

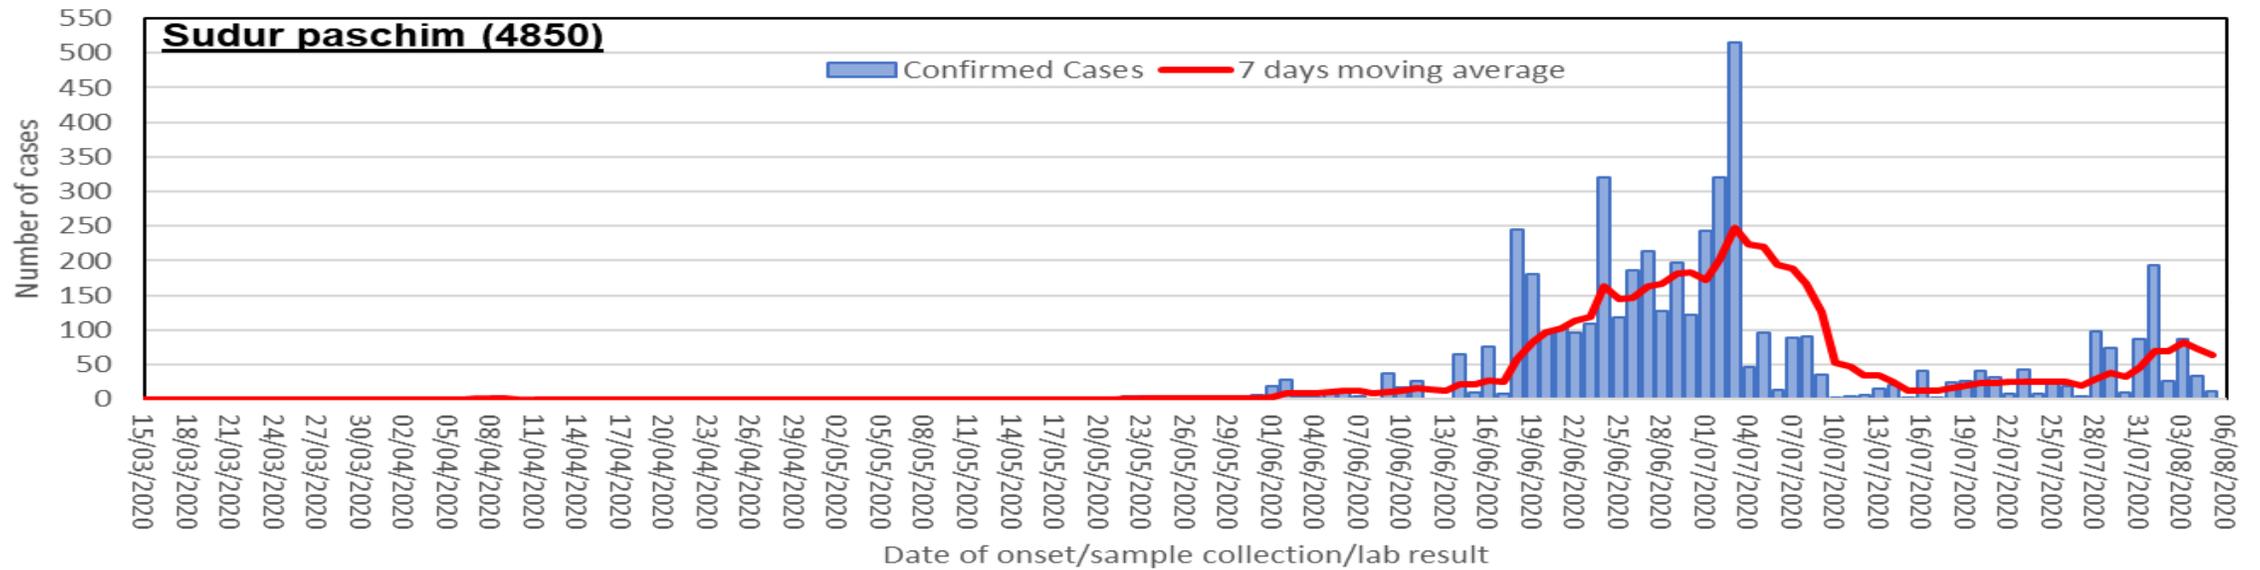

Note: The first case developed symptoms on 3 Jan 2020 in China and was confirmed on 23 Jan 2020(not shown here). Reference dates used in order of preference as available: Date onset/Date of sample collection/Date of confirmation.

Lab confirmed COVID-19 cases and 7-day rolling average of cases by date of onset/sample/confirmation by province – 5 and Karnali

Note: The first case developed symptoms on 3 Jan 2020 in China and was confirmed on 23 Jan 2020(not shown here). Reference dates used in order of preference as available - Date onset/Date of sample collection/Date of confirmation.

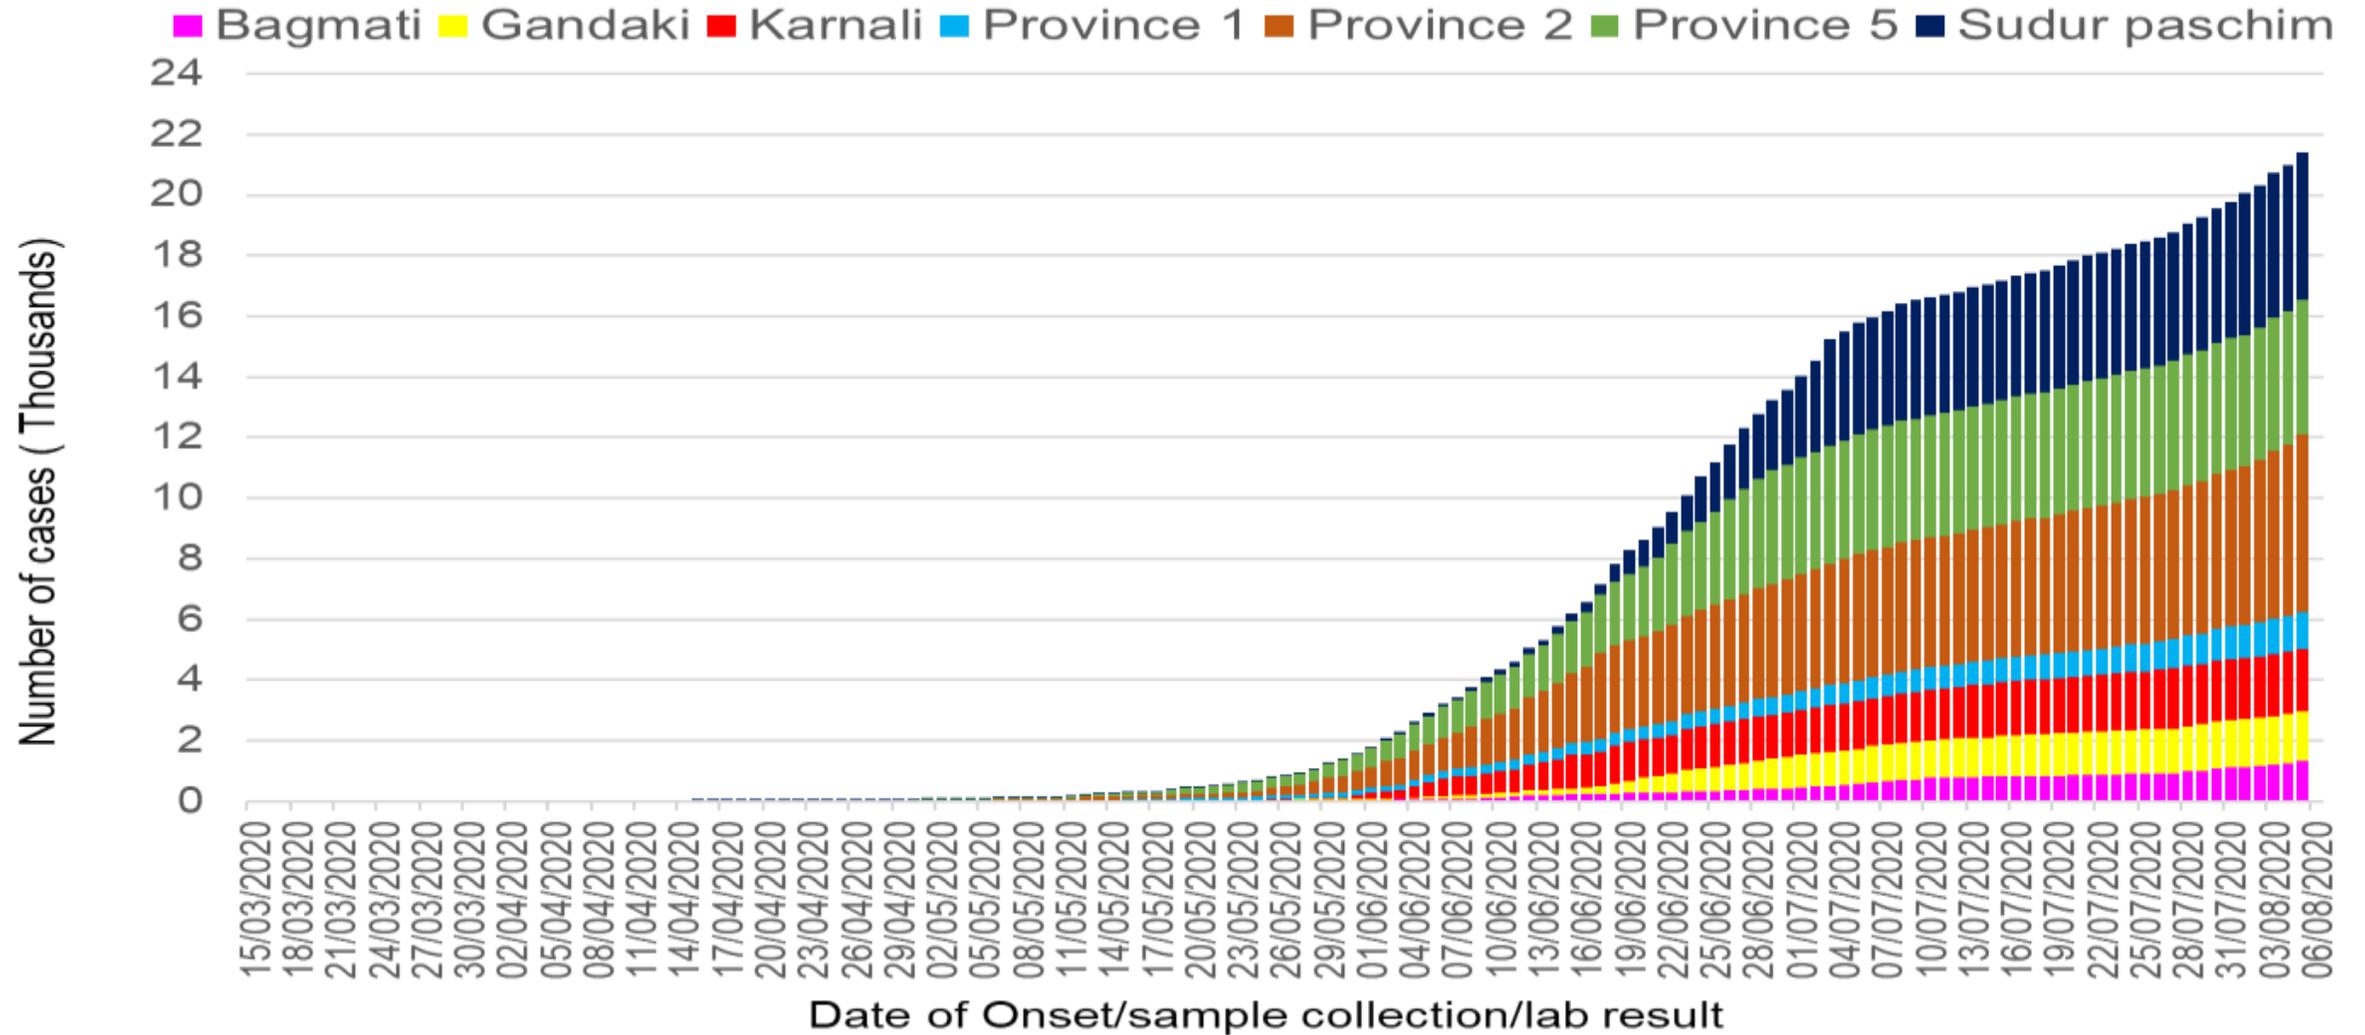

Lab confirmed COVID-19 cases and 7-day rolling average of cases by date of onset/sample/confirmation by province – Sudur Paschim

Provinces showing significant increase in 7-day rolling average case incidence: Province-2, Sudur Paschim and Bagmati.

Note: The first case developed symptoms on 3 Jan 2020 in China and was confirmed on 23 Jan 2020(not shown here). Reference dates used in order of preference as available - Date onset/Date of sample collection/Date of confirmation.

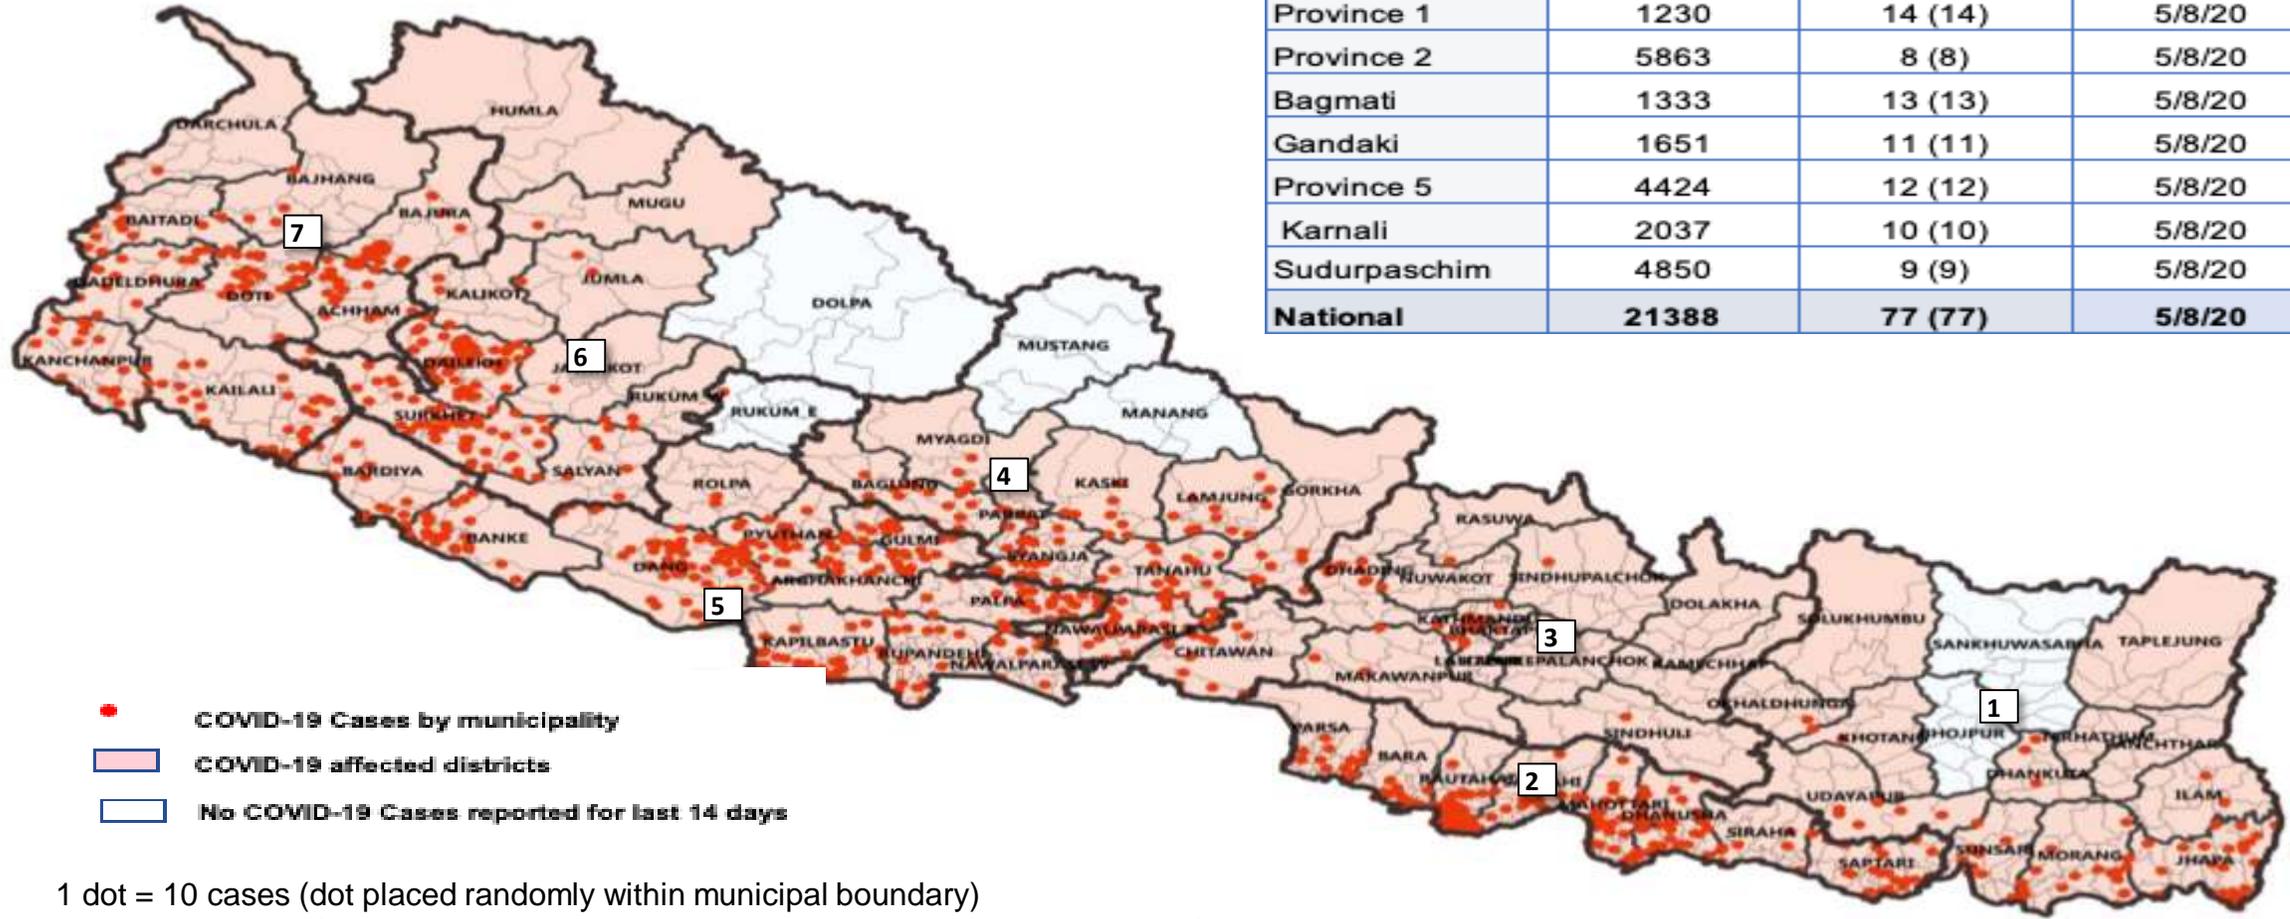

Cumulative case count of laboratory confirmed COVID-19 cases by province

Note: The first case developed symptoms on 3 Jan 2020 in China and was confirmed on 23 Jan 2020(not shown here). Reference dates used in order of preference as available – Date onset/Date of sample collection/Date of confirmation.

Place distribution

Municipalities (By domicile) with reported laboratory confirmed COVID-19 cases and districts shaded by current transmission status

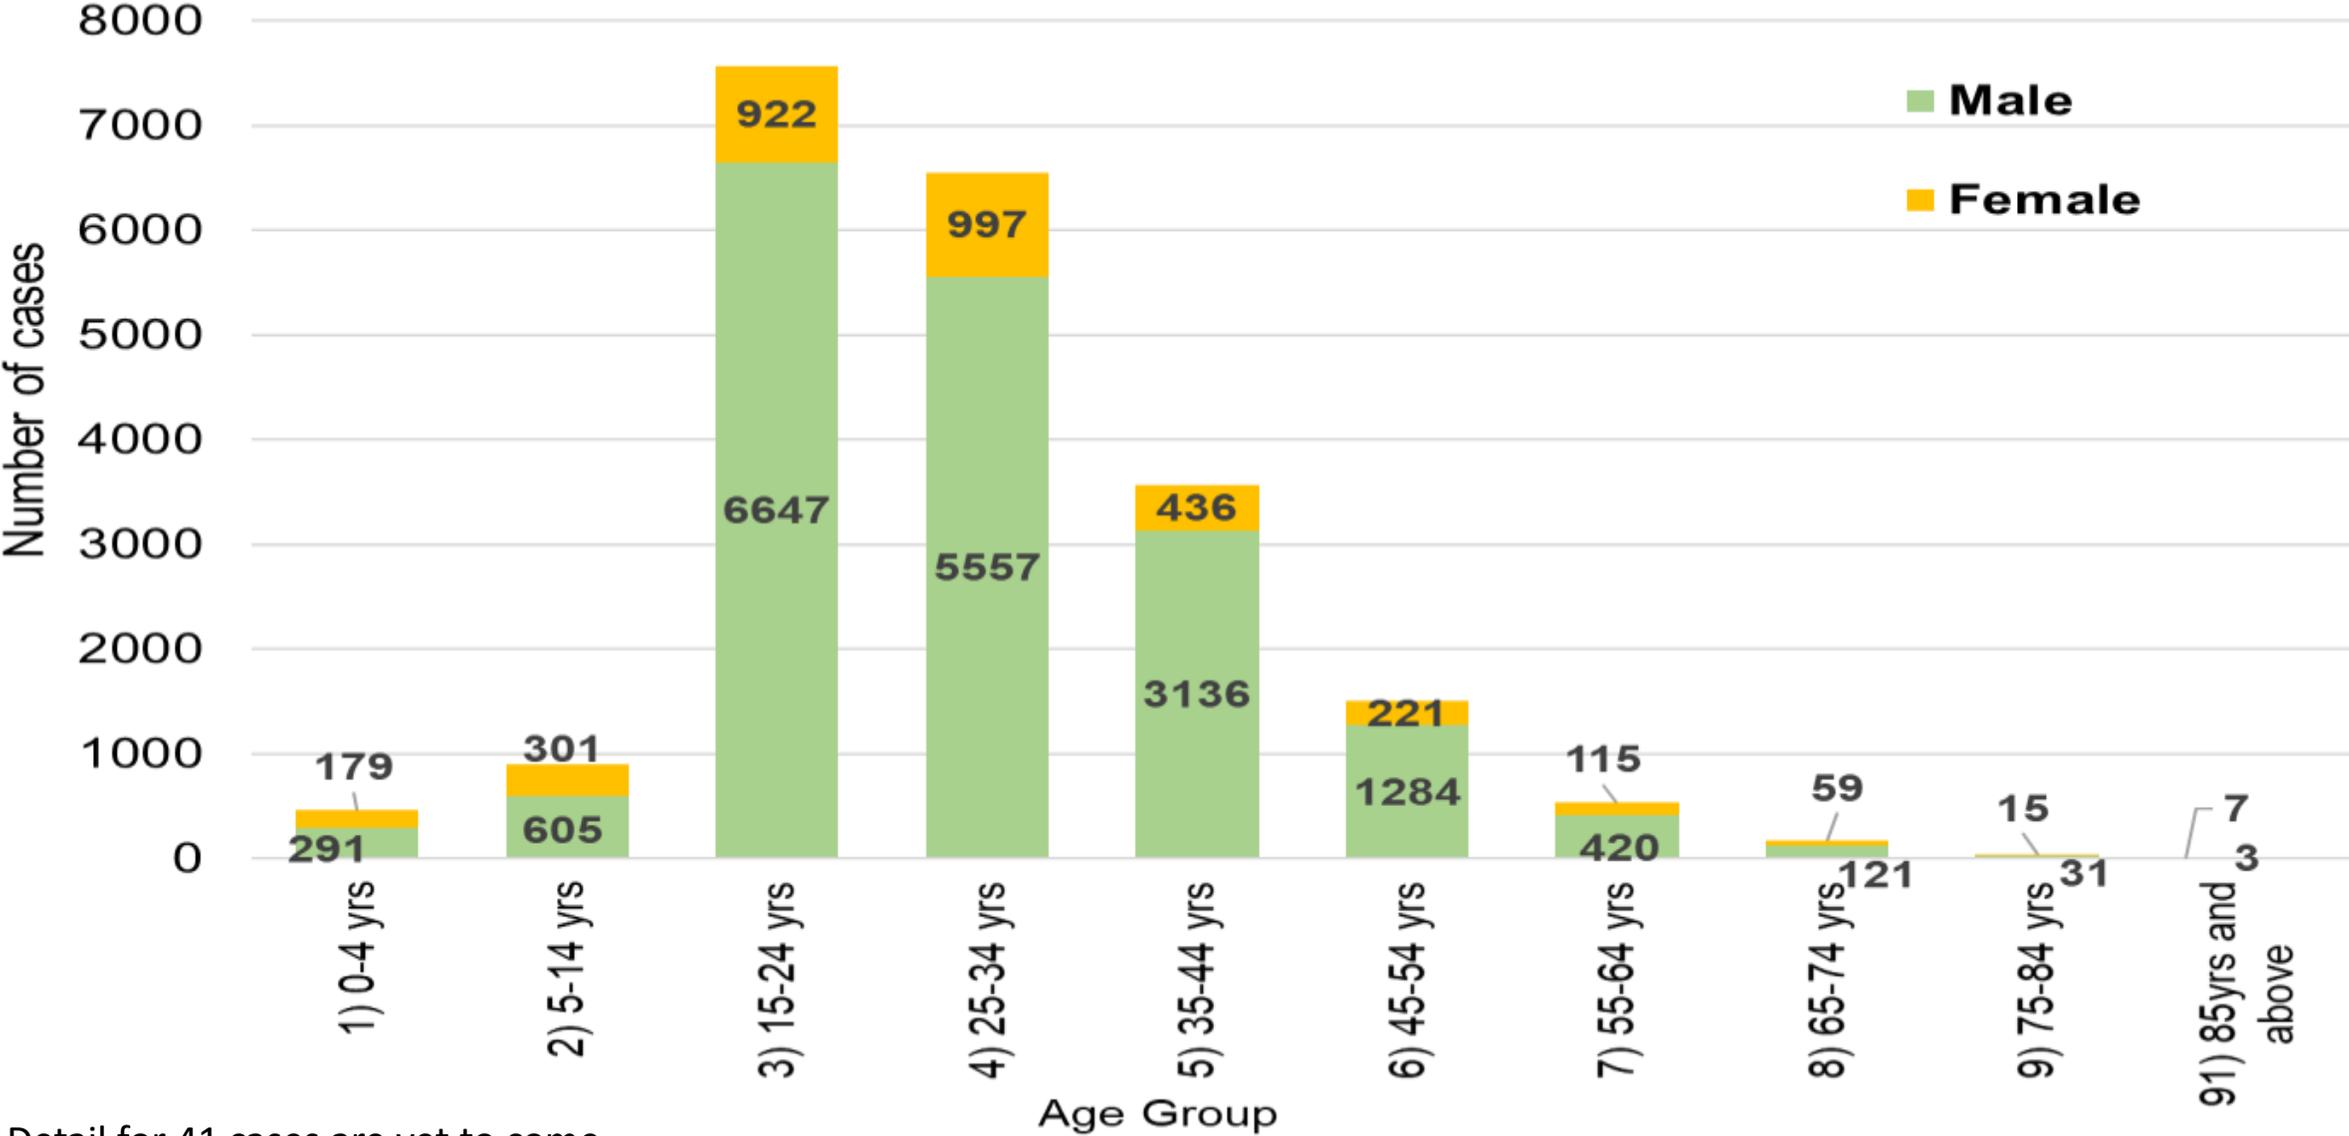

1 dot = 10 cases (dot placed randomly within municipal boundary)

A district is shaded if there is at least one case in any municipality within the district confirmed within the past 14 days

The boundaries shown used in the maps in this document do not imply the expression of any opinion whatsoever on the part of the World Health Organization concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Person distribution

Distribution of COVID-19 cases by age and sex (N=21347)

Detail for 41 cases are yet to come.

Distribution of COVID-19 cases by age and sex by province (N= 21388)

Percentage of male among total confirmed cases: 85% (18135/21388)

Percentage of male in 15-54 year among confirmed male cases: 92% (16624/18135)

Province	Sex	Age Group											Total
